Nationally-Certified Alzheimer Educator

Florida-Certified Dementia Training Provider

Learning Objectives

- Learn what doctors can accomplish with telehealth visits
- Learn how to prepare for appointment
- Learn the step-by-step instructions on how to video chat with doctor's offices

**Coronavirus
Disease 2019
(COVID-19)**

During COVID, residents/clients MUST:

- Continue to have regular doctor visits
- Have visits with doctors for new medical problems that do not require emergency department visits
- Have visits with doctors for existing medical conditions that change or worsen
- Realize ALL healthcare settings follow rigorous safety protocols (even more so during this pandemic)
- Understand telehealth provides peace of mind as we reduce an elder's risk of exposure to the coronavirus by eliminating unnecessary travel to a doctor's office.

What can be accomplished with telehealth?

- Urgent care, including evaluation of possible COVID-19 infection
- Quick diagnosis of conditions such as sinus infections, rashes or stomach virus
- Primary care, including medication management
- Management of diabetes, hypertension, arthritis and other chronic conditions
- Mental health counseling
- Consultation with specialists

-- MAYO CLINIC (5/2020 - edited)

How to Prepare BEFORE Appointment

- Follow instructions for downloading program or app
- Help resident/client make detailed notes to discuss with doctor
- Check that camera, speakers, microphone or headset is working
- If using smartphone/tablet, find area with strong Wi-Fi or mobile connection. Make sure there is enough battery power.
- Find quiet space where resident/client won't be interrupted.
- Set the device's camera at eye level
- Advise resident/client to wear loose clothing since the doctor or practitioner may want to see an area that needs further evaluation, such as the abdomen, lower legs, a skin lesion

DURING the Appointment

- Doctor appears on screen for appointment
- Inform doctor that you are helping the patient during the appointment
- Have the patient confirm they are giving permission for you to be present during the appointment
- Have good lighting in front of you and not behind you
- Make sure doctor can see patient at eye level
- During appointment, doctor may decide that the patient needs to be seen in person. Help set up that appointment.

DURING the Appointment (cont)

- Get prescriptions filled or request refills. Doctor will transmit prescriptions to pharmacy - make sure office has the correct info on current pharmacy.
- Make a follow-up appointment
- Get details for any specialist referrals
- Schedule lab work
- Write down all future appointments
- If patient is unclear on anything, help them ask questions or get answers. Don't be rushed – refer to all their previous notes.

**STEP-BY-STEP
INSTRUCTIONS FOR VIDEO
CHAT WITH THE DOCTOR**

DOWNLOAD APP

Dear Patient:

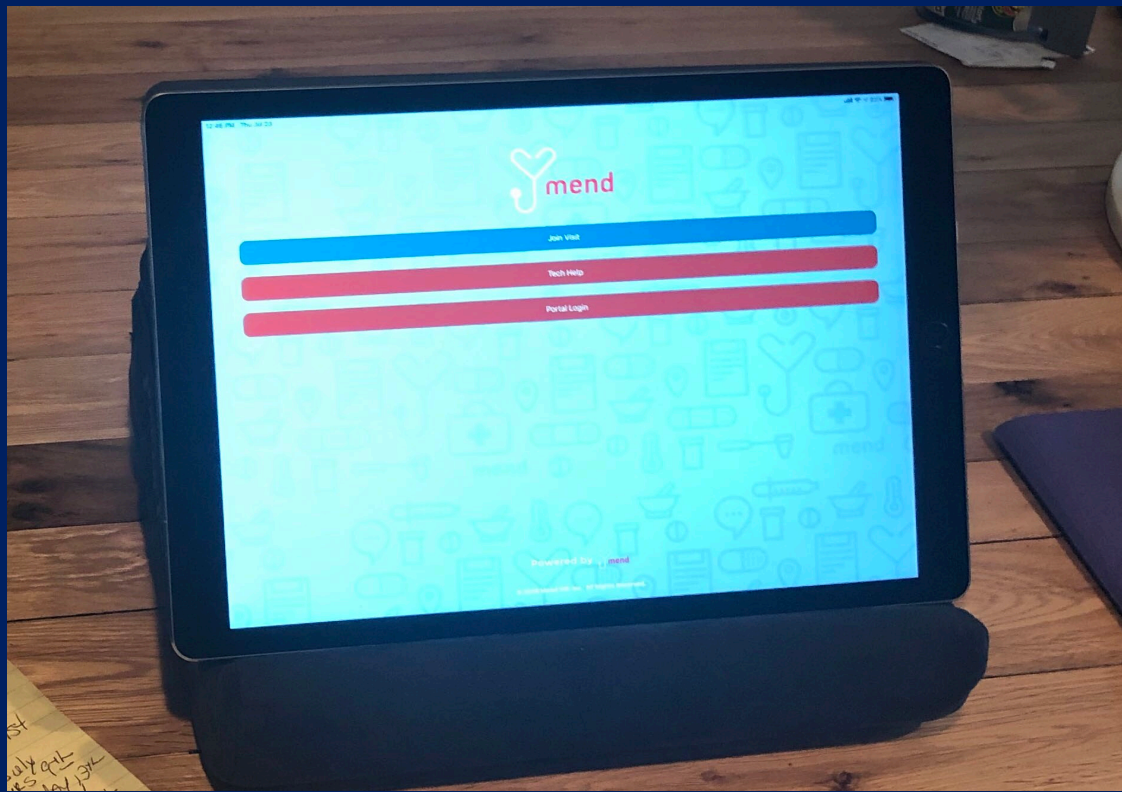

Your telehealth appointment is about to begin. To begin your Secure Video Chat with Dr.

Applebaum, please click the link provided here:

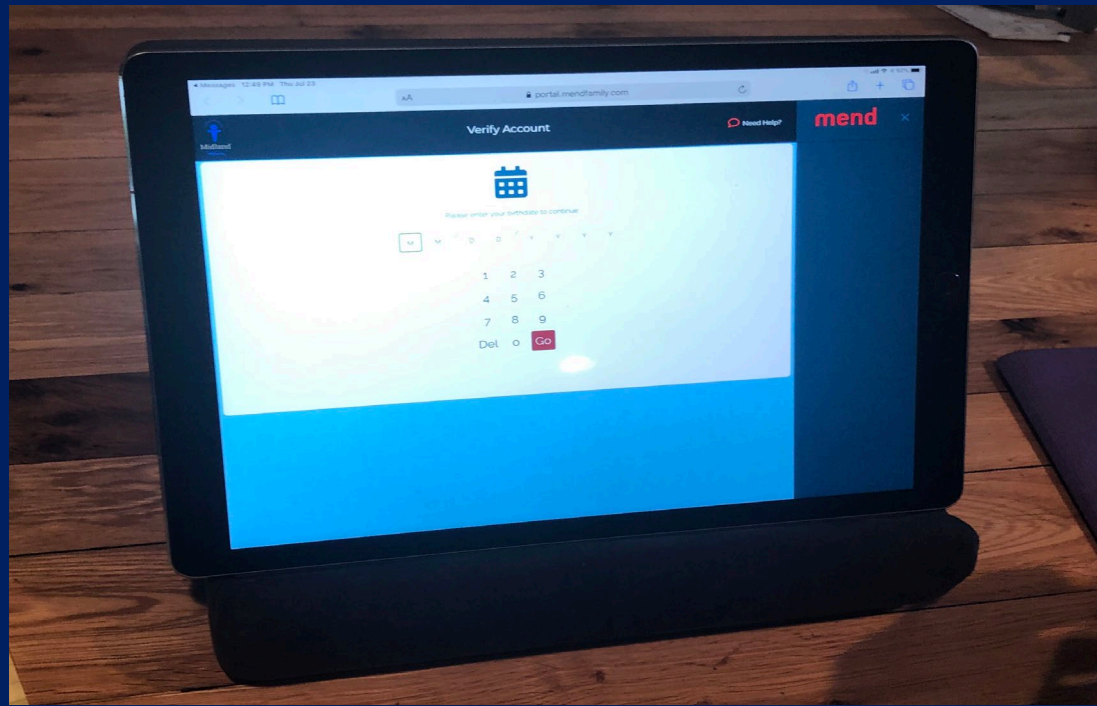

<http://getmydoc.dr/myappointment/today>

(this link is for EXAMPLE only)

**CLICK ON LINK PROVIDED IN
TEXT OR EMAIL FROM
DR. OFFICE**

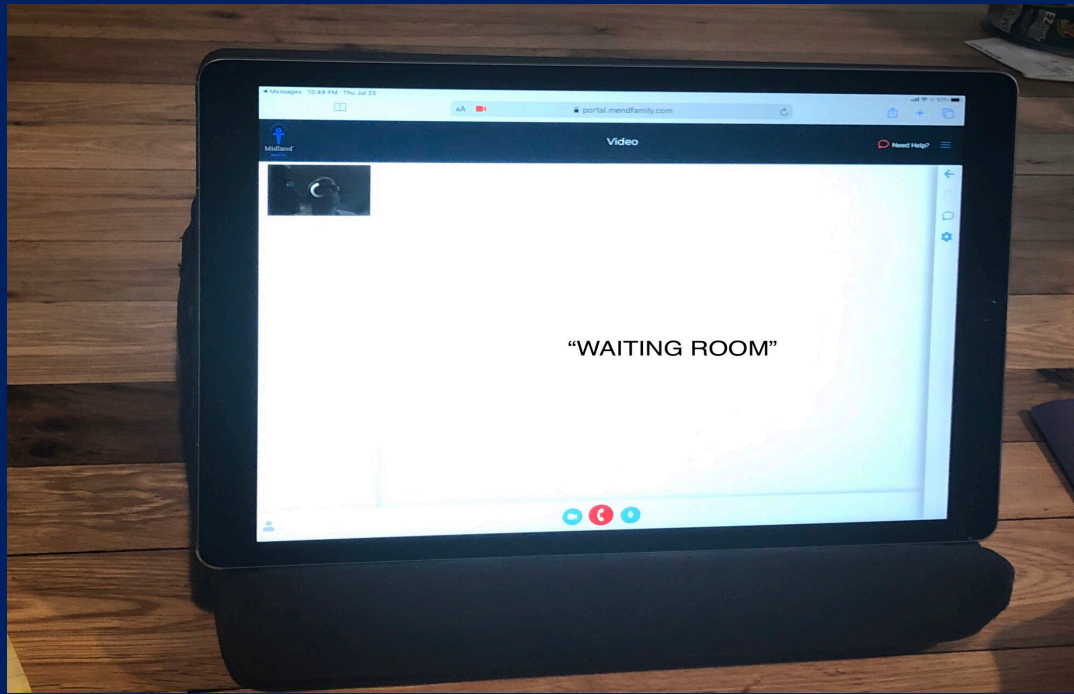

**CONNECT TO VIDEO CHAT
(each system will look different)**

**SYSTEM REQUEST TO CONFIRM IDENTITY
(usually patient date of birth)**

**SYSTEM: ALLOW ACCESS TO CAMERA &
MICROPHONE
(test prior to appointment)**

ENTER "WAITING ROOM"
(Do all previous steps before appointment time
and be prepared to wait)

DR. APPEARS – START VIDEO CHAT JUST LIKE AN IN-PERSON APPOINTMENT

Additional Steps:

- Connect through WiFi
- Use the correct app or connect to the appointment through a link provided by the doctor's office

OR

- If you don't have access to WiFi, use a smart phone or tablet to connect to the internet through a cellular connection.
- Use the correct app or connect to the appointment through a link provided by the doctor's office

Technical Difficulties

- Make sure there is a back-up way to connect to the doctor's office.
- Make sure the doctor has a cell phone number for your resident/client.
- If a connection is bad or is lost, the doctor can call and continue the appointment.

Common Platforms

In addition to programs or apps that doctors use, they may use more common platforms that you might be familiar with:

- Face Time
- Duo
- Facebook Messenger
- Google Meetings (formerly Google Hangouts)
- Zoom
- Skype

**IF YOU DON'T HAVE ACCESS TO INTERNET, TELL
DOCTOR'S OFFICE AND THEY WILL CONDUCT THE
APPOINTMENT OVER THE PHONE.**

INFORMATION:

Additional Tips

- Make sure doctor has all updated info and any lab results
- Make sure resident/client has notes jotted down for discussion with doctor; go over notes in case you need to assist
- Check and double check equipment!
- Have pen and paper ready to take notes to discuss after appointment
- Make sure you're in a quiet area with no interruptions
- Be prepared for back-up plan – there will probably be technical difficulties.

NOTE:

People have suffered serious health decline
and some have died from non-COVID health
concerns because they didn't seek medical
attention!

NOTE:

**Please don't let your resident/client be that
person who didn't receive medical care
because of worry of COVID!**

NOTE:

**Hospitals and doctor's offices are very
careful to protect ALL PATIENTS from
COVID.**
